Serenity Acoustic Rafts

Serenity Acoustic Rafts are designed to provide acoustic comfort by absorbing sound, helping to eliminate echo and reverberation. Additionally, sound is trapped in the void between the panel and ceiling surface.

Serenity Acoustic Rafts are made using our Eco Polyester material. The 24mm thick panels can be cut to any shape and size up to 1,200mm x 2,400mm with the assistance of our Design Team. We also have a number of existing designs to choose from, all of which are available in over 20 colours. Bespoke designs available.
